PROFESSIONAL SUMMARY

Recent B.Tech graduate in Artificial Intelligence and Machine Learning with hands-on internship experience in data pipeline automation and AI-powered developer tools. Built academic projects in NLP and recommendation systems using PyTorch, Scikit-learn, FastAPI, and Docker. Strong foundation in Python, SQL, and supervised learning with practical exposure to model training, evaluation, and REST API development.

EDUCATION

St. Martins Engineering College, Secunderabad	2022 – 2026
<i>B.Tech in Artificial Intelligence and Machine Learning</i>	<i>CGPA: 8.01</i>
MJPTBCWRJC, Nizamabad	2020 – 2022
<i>Board of Intermediate Education</i>	<i>Percentage: 91.8</i>
Sri Vijaya Sai High School, Bodhan	2019 – 2020
<i>Secondary School Certificate</i>	<i>CGPA: 10</i>

TECHNICAL SKILLS

- **Languages & Databases:** Python, SQL (PostgreSQL, MySQL)
- **ML & Data:** PyTorch, Scikit-learn, Pandas, NumPy, Feature Engineering, Supervised Learning, Model Evaluation
- **MLOps & Tools:** Git, Docker, FastAPI, REST APIs, Jupyter Notebook, Streamlit
- **Visualization:** Power BI
- **Domains:** NLP, Recommendation Systems, Predictive Modeling

WORK EXPERIENCE

AI Intern ZenithIndia	May 2025 – July 2025
– Automated REST API data ingestion pipeline processing 10,000+ seller records daily using Python and Pandas, eliminating ~6 hours/day of manual data extraction.	
– Designed Power BI dashboards tracking 10+ KPIs adopted by executive leadership for strategic decision-making.	
– Built an AI-powered code comment generator using Llama-2-7B (4-bit quantized, Hugging Face) and Streamlit, enabling automated Python docstring generation for developer documentation.	

PROJECTS

SonicStream – Online Music Recommendation System	<i>Feb 2026</i>
– Developed a full-stack music streaming platform with a PyTorch-based recommendation engine, FastAPI backend, and React frontend. Implemented user-song-artist graph embeddings for personalized recommendations.	
– Built REST API endpoints for recommendation serving and model management; containerized the application with Docker and deployed on Hugging Face Spaces and Vercel.	
– Tech: Python, PyTorch, FastAPI, Docker, React (TypeScript), Google Firestore GitHub: Music-Recommendation-System	
Spam Detection in SMS (NLP Pipeline)	<i>April 2025</i>
– Built an end-to-end NLP pipeline using TF-IDF vectorization and Naive Bayes classifier to categorize 5,500+ SMS messages as spam or ham with 95% accuracy.	
– Performed text preprocessing and feature selection, reducing the feature space by 40% while maintaining model performance.	
– Tech: Python, Scikit-learn, NLTK, TF-IDF GitHub: Spam-Detection	

LEADERSHIP & ACHIEVEMENTS

Vice President Street Cause	2024 – 2025
– Spearheaded fundraising initiatives securing INR 1.5L+ , funding social impact projects for 1,000+ beneficiaries.	
– Managed cross-functional teams to execute 15+ large-scale events, optimizing workflows and increasing efficiency by 20% .	

CERTIFICATIONS

- **Python for Data Science** — IBM / Cognitive Class
- **Machine Learning Foundation** — Infosys Springboard
